Application/Control Number: 10/073,926

Art Unit: 1712

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear what is required for principal chain (A1). Does it consist of a copolymer of styrene and (meth)acrylate in which styrene is a principal component?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hoene. The reference teaches a composition comprising unsaturated resin, unsaturated monomer and graft copolymer containing a principal chain that can be polystyrene or styrene copolymer and side chains of polyether. See examples. The compositions may contain addition polymerized polymer. See col. 9, lines 36-41. As it is not clear what is required as the principal chain, this rejection is made under both of 35 U.S.C. 102 and 103.

Art Unit: 1712

Claims 1-5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hess. The reference teaches a composition comprising unsaturated resin, unsaturated monomer and graft copolymer containing a principal chain that can be styrene copolymer and side chains of polyether. See examples. The compositions may contain addition polymerized polymer. See col. 8, lines 54-59. As it is not clear what is required as the principal chain, this rejection is made under both of 35 U.S.C. 102 and 103.

Liedtke and Tatum cited to show compositions comprising unsaturated resin, unsaturated monomer and graft copolymers containing a principal chain that can be polystyrene or styrene copolymer and side chains of polyether.
